

Geoffrey Worrall is now able to offer “InLine Invisible®” Orthodontic Splints

Beautiful teeth show well-being and attractiveness. The condition of your teeth plays an important role in your social life. A nice smile makes you feel great and has a positive effect on your private and business life. Your smile is an eye-catcher and your teeth are your personal business card.

Is the system suitable for me?

For an IN-LINE® treatment, skeletal growth should be complete, which means that we mainly treat adults. Almost all cosmetic dental correction in adults is successfully treated using IN-LINE®. To ensure the correct treatment for you, please talk to the Receptionist who can arrange an initial consultation with Mr Worrall.

A beautiful smile can be as simple as that!

Some people have naturally straight and beautiful teeth. You may have small tooth defects making you feel uncomfortable and unhappy with their appearance. A modern and contemporary method called IN-LINE® makes it possible to correct teeth that are too far apart or teeth that are overcrowded. It guarantees a delightful smile and can improve your attitude to life.

What makes our system so different?

IN-LINE® is almost transparent and at the same time gently moves the teeth. IN-LINE® consists of a set of removable plastic splints, which means the teeth are corrected and repositioned without the need for the most commonly used metal braces.

If you are interested in this treatment, please ask at Reception. Our practice Manager is currently using this system and if you would like to see it in action and like to know more, she is happy to share her experience with you. This treatment is only available on Private Fee Basis, generally in the region of upwards of *£1500+ (and your investment for this treatment will vary according to case complexity*).
